

The New Future of Christianity - 1974 September 18th

A seminal speech given in 1974 September 18th in Madison Square Garden, New York. It contains the key points that conventional Christianity struggles with, clearly explained with reference to the Holy Bible, such as: 'Jesus did not come to die'; and, 'the failure of John the Baptist to make straight the way of the Lord'; among others. You owe it to yourself to check this out, and see exactly where this New Truth is grounded.

The AudioBook is just short of 80 minutes but, since it is divided into 20 mp3 files that are numbered and titled, you can listen to the topics in around 5 minutes or less, and evaluate these ideas in their context.

A standing room only crowd of 25,000 was packed into Madison Square Garden at 19:00 hrs on that day, with an estimated 15,000 more gathered outside. Hope that you, yourself, will catch the excitement of this content. I thank you for taking the time to check this out.
